

PRESS RELEASE

KooKoo Company Profile

KooKoo GmbH develops and distributes voice clocks, which render the call of an animal every hour, on the hour. KooKoo products come in two groups: large 13.4 inch wall clocks, called “Songbirds”, “KucKuck”, “KidsWorld” and “KidsZoo”, including two special edition small 8.1 inch clocks; “KooKoo BirdHouse”, a combination between traditional cuckoo clocks and modern voice clocks and “KooKoo EarlyBird”, an alarm clock with a difference.

All the songs and calls are original field recordings. An integrated light sensor (except for EarlyBird) ensures that the animals and birds go to sleep at night and wake up at dawn again.

KooKoo GmbH was founded in 2002 and is now well known outside Germany. The success of the company is based on:

- an excellent product: high quality sound and original field recordings
- excellent logistics, “delivery on demand”
- perfect customer service and care

KooKoo distribution deals with orders, packing and shipping, and is located in Hallbergmoos near Munich airport.

Available at Amazon.co.uk or www.kookoo.eu/en
