KooKoo - The Original Singing Bird Clock

Every hour, on the hour, an original birdsong may be heard. Chosen among 12 native songbirds – from the blackbird to the nightingale and the oriole. Each bird sings its own melody. It makes telling the time both entertaining and enjoyable. The original field recordings ensure high-quality sound.

At dusk the birds go to sleep, an integrated light sensor automatically switching the songs off when it gets dark. The colourful, realistic illustrations are by the renowned graphic artists Kilian Mullarney and Dan Zetterström.

An informative brochure is included and describes the distinguishing features, calls and habitats of the 12 birds illustrated.

The clock is available in three finishes: green, wood or aluminium. Two sizes are available: large 13.4 inch (34 cm), small 8.1 inch (21 cm). Also available is a small Christmas clock called “Silent Night”, which plays 12 traditional Christmas carols.

Price start from £29.90. Available at Amazon.co.uk or www.kookoo.eu/en
